

ISO-TIP®

Cordless Soldering Gun

WAHL CLIPPER CORPORATION

The ideal service tool for both electronic and electrical work.

Provides about three times the operating capacity of **ISO-TIP®** cordless soldering irons for big jobs and more of them. Powerful rechargeable nickel cadmium batteries maintain charge for up to

350-400 electronic joints . . . and with # 7593 hi-temp tips will easily solder # 12 wire for industrial or home electrical installation and repair.

Automatic solder feed from self-contained solder spool is an integral part of the unit, and feeds by depressing trigger. This feature is unique with the Iso-Tip Cordless Soldering Gun and provides easy, accurate one-handed soldering.

Choice of 16 different snap-in

tips for a multitude of soldering jobs. Tips achieve soldering heat in 5 to 8 seconds when trigger is depressed. Has built-in work light and lock-off switch to prevent accidental heating of tip.

A rugged, durable, practical soldering gun that adds muscle to cordless soldering.

Plug-in charger will fully recharge a "dead" soldering gun overnight. Can't overcharge.

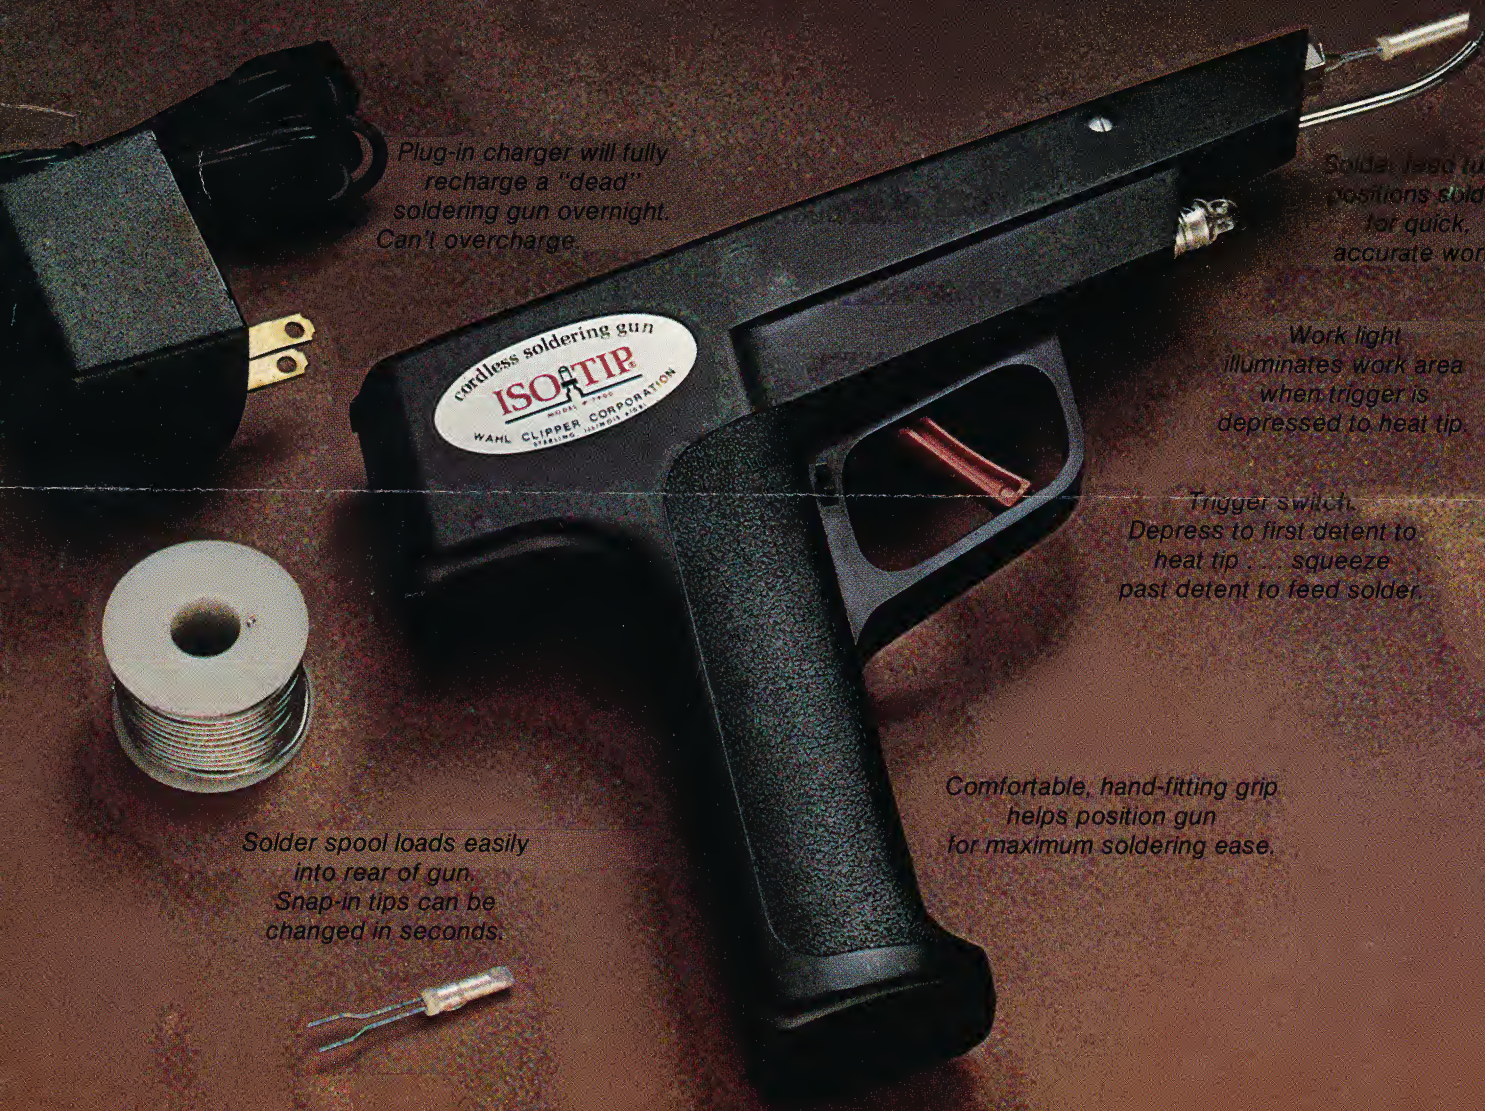

Solder feed tube positions solder for quick, accurate work.

Work light illuminates work area when trigger is depressed to heat tip.

Trigger switch. Depress to first detent to heat tip . . . squeeze past detent to feed solder.

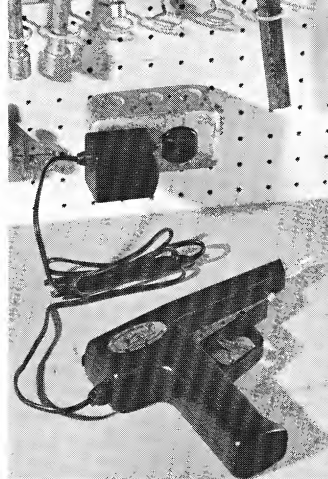

Comfortable, hand-fitting grip helps position gun for maximum soldering ease.

Solder spool loads easily into rear of gun. Snap-in tips can be changed in seconds.

ISO-TIP® Cordless Soldering Gun

Self-contained automatic solder feed supplies solder through feed tube at the tip whenever trigger is fully depressed. Refillable solder spool fits easily into chamber at rear of gun.

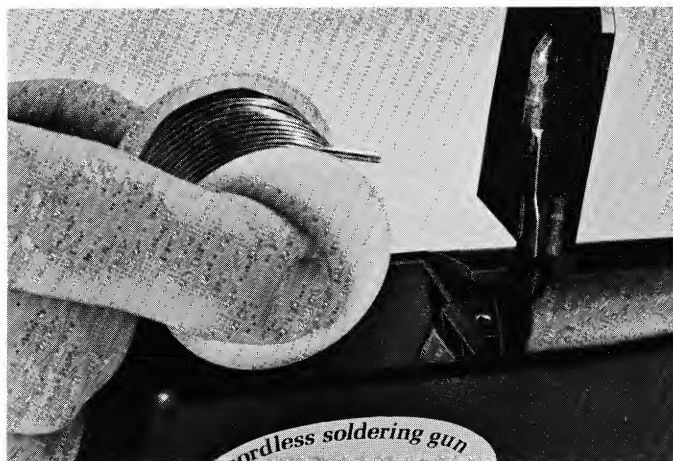

Charger plugs into any 110-120V outlet to provide full recharge overnight . . . or to maintain charge between uses.

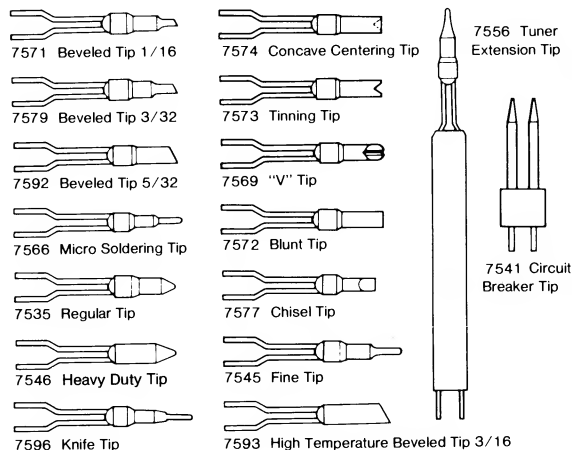

Snap-in design permits quick interchange of tips. Snap-in for use, snap-out for safe carrying or storing.

Low voltage isolated-tip construction eliminates electrical leakage, and the need for grounding. Reduces risk of damage to delicate electronic components.

Increase the gun's versatility with the wide choice of available snap-in tips — from the most delicate electronic work to production soldering of # 12 electrical wiring.

The new **ISO-TIP®** Cordless Soldering Gun puts a highly capable and versatile tool into the hand of professional and handyman alike. Its cordless feature provides maximum working freedom while its increased power capacity enables the user to perform a wide variety of electronic **and** electrical soldering functions.

Catalog No. 7900 Kit consists of Cordless Soldering Gun with Automatic Solder Feed, Solder Spool, Separate Plug-In Recharger, One #7593 High Temperature Beveled Tip, One #7577 Chisel Tip and Instruction Booklet.

Also available without automatic feed. Catalog No. 7920 identical to above but without automatic solder feed. Supplied with Separate Plug-in Recharger, One #7593 High Temperature Beveled Tip, One #7577 Chisel Tip and Instruction Booklet.

(patent applied for)

Made entirely in U.S.A.
